Easily select between ROMs on boot using the custom Early Boot Menu

# A1200 8MB RAM + FLASH

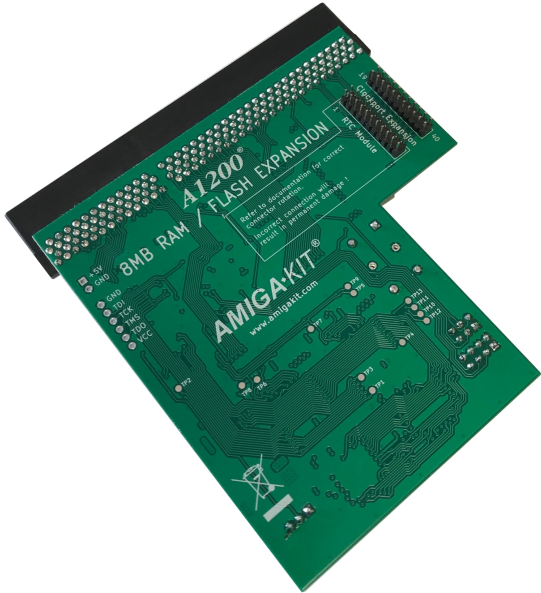

# Great for WHDLoad!

This card slots into the trapdoor and provides the extra memory required for WHDLoad gaming.

# Extra Speed!

This great value expansion speeds up your Amiga 1200. You can even have a 40Mhz Co-Processor installed in it.

# Great Value

Amiga Kit is pleased to offer this great value expansion at a low price with so many exciting features not seen together on any Amiga 1200 memory expansion before.

This new card builds on the technology developed for our earlier expansions and enhances the features with the Flash memory and software.

*A1200 is a registered trade mark of AmigaKit Ltd in the United Kingdom and/or other countries. Real Time Clock module and FPU/Crystal are optional extras and shown in pictures for demonstration purposes only.*
